| -Connecting IoT Devices to Cloud Services. | |

PROJECTS:

#FRONTEND PROJECTS:

(View Projects :- [Click Here](#))

- E-commerce Website
 - Built a fast and responsive web app using Vite, JavaScript, and ESLint. Managed dependencies with npm and optimized development with custom Vite config.
- Netflix Clone
 - Developed a responsive Netflix clone using HTML and CSS, replicating the homepage UI with accurate layout, styling, and design elements.
- Blog Website
 - Built a responsive blog using HTML, CSS, and JS with dynamic content & clean UI design.

#BACKEND PROJECTS:

- Java Programming
 - Developed a Java-based food ordering system using MVC architecture. Implemented customer registration, food menu management, cart handling, and order processing with JDBC for database interaction.
- CRUD Web App using JSP & Servlets
 - Built a web application with JSP, Servlets, and MySQL to perform CRUD operations following the MVC pattern.
- C Programming
 - Developed an ATM system for Balance Inquiry, Withdrawal, Deposits & Change PIN.

SKILLS:

- Programming Languages:- JAVA | MYSQL | JDBC | HTML/CSS | JAVASCRIPT
- Interest:- Web Development | Software Development | Frontend | Backend
- Microsoft Office Suite:- Word | Excel | PowerPoint | Access | Publisher
- Tools :- Chatgpt | Wordpress | Claude | Cursor | Deepseek
